

Freescale Semiconductor is a global leader in the design and manufacture of embedded semiconductors for the automotive, consumer, industrial and networking markets. Our products are all around us, you touch them every day.

To support the growth and the development of our Automotive Microcontroller Solution Group in **Munich** we are looking for a:

Product Manager / Marketer (f/m) for Body Electronics

The Automotive Product Management team is responsible for new products definition, planning and promotion. Product managers within this team, supported by cross functional teams, drive new product ideas through the New Product Introduction (NPI) process. Each team member has a product as well as a regional focus. The team is accountable for developing a compelling product roadmap associated with clear financial goals in a highly competitive and demanding automotive environment.

For this position you will be responsible for 32bit microcontrollers serving the body electronics segment with a focus on the European market.

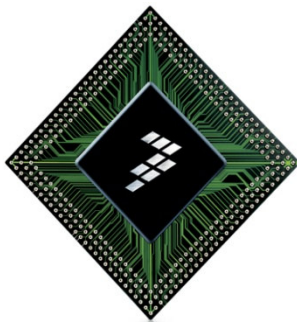

To be successful in this function you will have already demonstrated the following skills and competencies:

- Be an excellent communicator able to comfortably interact with many levels within an organization
- Possess key behaviors such as enthusiasm, curiosity, and a strong work ethic.
- Be autonomous and able to manage his own workload.
- A scientific/electronic undergraduate degree, Masters Degree in Electrical engineering or business school preferred
- At least 2 years of successful experience in business development or product management in the field of electronic embedded systems.
- Experience in hardware or software development of embedded systems preferred.
- Experience in automotive preferred.
