Senior Application Engineer Small Signal MOSFETs, Business Development (f/m)

The Position

We are looking for engaged Electronics Hardware senior designers with experience in design of discrete logic blocks and low-power power-management who will work on marketing the Small Signal MOS technologies and defining the next products based on customer requirements and marketing strategy. We seek to enlarge our market presence through a marketing strategy that is based on the differentiation potential of our semiconductor devices for the automotive and industrial market and for distribution business. With a portfolio of high quality and benchmark products we foster changes from today's solutions into more reliable and energy efficient systems.

Your main responsibility will be to work out the key advantages of our Small Signal MOSFETs for the target applications, i.e. LED-drivers, battery management and amplifiers, and work on and execute strategies to bring these solutions to the market. Furthermore you will actively support our lead customers on a world-wide basis with our latest products and findings how to use them in the most beneficial way. Your know-how will be shared globally in experts' circles and trainings for our world wide sales force and will be documented in application notes. Your findings will be also published in papers and articles provided to respective media and industry events such as PCIM. Your view on the market and its trends will influence decisions on the next generation of power semiconductor devices.

Position requirements

- University degree in electrical engineering,
- A minimum of 3-5 years of professional experience in the design, development and test of Small Signal MOS applications
- A broad knowledge of low-power power-design and discrete logic, the electrical behavior of Small Signal devices and ideally knowledge of semiconductor device physics is preferred but not a must.
- Understanding of marketing and sales channels
- Strong business drive and entrepreneurial spirit.
- Customer orientation
- Team work orientation, network and strong communication skills
- Experience in the field of professional customer assistance in a global environment is preferred.
