

eCarTec

1st International Trade Fair for Electric Mobility

October 13 - 15, 2009
New Munich Trade Fair Centre

Electric vehicles are the future. The trade fair eCarTec brings technology offers of the main pillars of the electric mobility together: energy, automotive technique and electrical industries as well as finance.

An additional training area where end consumers can test the latest electric vehicles and familiarize themselves with this technology, is also integrated.

This trade fair focuses on developers, construction engineers, designers, managers, traders, car fleet managers, private car buyers and decision makers from politics and public authorities.

Additionally, a specialist conference on the topic of electric mobility will parallel organized.

Parallel Trade Fair
