### **About the EPE'25 Publication Policy:**

In the past editions, EPE conferences were associated to the traditional and well-known IEEE Xplore® digital library. In this edition, EPE'25, for its 40<sup>th</sup> anniversary, is evolving and for the first time, would be fully associated with the Open Science! Thus, conference papers will be published in Open Access and will appear as an online available paper (with DOI). The conference papers will be sent for indexing to the scientific databases, such as Google Scholar.

In addition, a special issue of “Power Electronic Devices and Components”, Elsevier’s Open Access Journal, will collect a selection of extended post-conference papers fully in the scope of the journal. Authors will be invited to submit the extended post-conference paper (suitable for journal publication) after the conference. The papers will undergo a successive peer-review process.

Power Electronic Devices and Components (PEDC) is an open-access journal specifically focusing on power-electronic devices and components, including materials, fabrication, design, characterization, and applications. The journal is indexed by SCOPUS and WOS. More information about the journal topics is available on [PEDC web page](#).

For more information, please see the “[Publication Policy](#)” webpage on the [EPE’25 website](#).

We hope to receive a lot of submissions and that we can have a great event in Paris!  
We look forward to meeting you there !
