

# BUILD UP YOUR CAREER

## ABOUT US:

- At **onsemi**, we help improve lives through **silicon solutions** every day. Our **intelligent power and sensing technologies** solve the world's most complex challenges and lead the way in creating a safer, cleaner, and smarter world.
- We are building a **better future through intelligent technology**. We are a successful **global manufacturer of semiconductors** with a long tradition for over 60 years and branches worldwide.
- Our headquarters is located in **Scottsdale, Arizona**, serving as a modern hub for our global operations.

## WHY JOIN US?

- We **create a diverse set** of world-class products in a **friendly and team-oriented** atmosphere.
- We provide an environment of **continual learning and growth opportunities** and support volunteer & charitable programs.
- You will have a very competitive **benefit package**.

## OPEN POSITIONS

More info  
about  
positions:

### GERMANY - MUNICH

- MTS, Power Module Design
- Microelectronics System and Packaging Mold Flow Simulation Engineer
- Principal Systems Architect
- SiC Wafer & Package Technology Development Engineer

### CZECH REPUBLIC - BRNO

- Applications Engineer
- Lead Digital Design Engineer
- Senior Principal Analog Design Engineer
- Senior Design Manager

### SLOVAKIA - PIESTANY

- Application Engineer
- Principal Application Engineer

### SWITZERLAND – MARIN

- Digital IC Design Engineer
- Senior Mixed-Signal IC Design Engineer
- Senior Digital IC Verification Engineer
- Senior Principal Digital IC Design Engineer
